Cairo, Egypt

## OBJECTIVE

---

Enthusiastic software developer eager to learn and grow within a dynamic team. Committed to expanding my full-stack skills, embracing new technologies, and delivering innovative solutions.

## TECHNICAL SKILLS

---

**Languages:** C++, Python, JavaScript, TypeScript, Ruby, HTML, CSS, SQL.

**Frameworks, Libraries:** React.js, Next.js, Vue.js, TailwindCSS, Bootstrap, jQuery, Node.js, Express.js, Ruby on Rails, Flask.

**Databases:** PostgreSQL, MongoDB, Redis.

**Platforms & Tools:** Git & GitHub, NPM, Postman, Figma.

**Concepts:** Data Structures, Algorithms, Object-oriented Programming, Problem Solving, Web Scraping, Web Automation.

## PROJECTS

---

**Movibes** | [Github](#) | [Live Demo](#)

*A Movies/Tv shows website / React, Nextjs, TypeScript, PostgreSQL*

- Implemented user authentication using JWT and PostgreSQL database that has users data.
- Created a robust search functionality for easy discovery of movies and TV shows.

**Fullstack URL Shortener** | [Github \(Frontend\)](#) | [Github \(Backend\)](#) | [Live Demo](#)

*Vuejs, Nodejs, Expressjs, TypeScript, PostgreSQL*

- Implemented user registration/authentication, URL shortening, and database interactions.
- Introduced a user-friendly feature allowing users to track links visits count, enhancing user engagement.
- Utilized Jest for comprehensive unit testing on the backend, ensuring code reliability.

**Football Fixtures API** | [Github](#)

*Python, Flask, Redis, bs4.*

- Developed a dynamic Football Fixtures API by leveraging web scraping techniques to extract data from BBC Sports websites, providing up-to-date information on past and future matches.
- Implemented Redis caching mechanisms to optimize performance and reduce latency, ensuring swift retrieval of both historical and upcoming fixture data.
- Demonstrated proficiency in integrating multiple technologies, including web scraping and caching solutions, to deliver a reliable and efficient API for accessing football fixtures data.

## Vending Machine API | [Github](#)

*Nodejs, Expressjs, TypeScript, Prisma ORM, Sqlite3, Jest.*

- Developed a robust RESTful API for a vending machine system, incorporating CRUD operations for users (sellers and buyers) and product management.
- Implemented secure authentication and authorization mechanisms to ensure data privacy and access control.
- Utilized Jest for comprehensive testing coverage, ensuring the reliability and stability of the API.

## Fullstack Tasks Management Website | [Github](#) | [Live Demo](#)

*Ruby on Rails.*

- Developed a fullstack task management web application using Ruby on Rails, featuring CRUD functionality for tasks and user authentication.
- Integrated robust user authentication and authorization mechanisms, allowing users to securely register, login, and manage their tasks.

## URL Shortener CLI Tool | [Github](#)

*Python.*

- A CLI Tool that uses the [URL Shortener API](#), built with Python.

## OPEN-SOURCE CONTRIBUTIONS

---

### FreeCodeCamp.org:

- Modified website's content | [PR](#)
- Fixed a spelling error on the website. | [PR](#)

## EDUCATION

---

Bachelor in German Linguistics	October 2021 – July 2025
Ain Shams University, Faculty of Al-Asun (Languages)	Cairo, Egypt

Professional Frontend Web Development	July 2022 – September 2022
Udacity, Egypt FWD	
<a href="#">Certificate</a>	

## LANGUAGES

---

- **Arabic** – Native
- **English** – Upper Intermediate (B2)
- **German** – Elementary (A2)
